SEASONS GREETINGS
AND A HAPPY 2010

We are
hundreds
of community,
church, trade union,
student, local authority,
and medical and children's rights
groups and others
across the UK. We are
determined to tackle the
country's unjust and cruel immigration
policies. We have called for an end to the
detention of children, an end to the expansion
of the 'detention estate', an end to indefinite detention
of people who cannot be expelled
to other countries. We call for people
to be treated with dignity and respect. We
defend basic democracy and decency. We call for
proper respect for the rights of refugees under the 1951
UN Convention on Refugees. We are for the right to family life.
We are against these immigration policies that do not work and
are enormously expensive. We are for money to be spent where it
can do good, on education, housing and health, not on paying companies
that run detention and escort and make private profit out of migrant misery. We
are against the increase
in surveillance and of
tough talk and policies
that deter no one, but
divide our communities.
We are against scape-goating innocent people.
We are against the government playing the
racists' game. We are against the
criminalization of migrants.
We are for migrant rights.
